## No.1 choice

**The number 1 choice  
for quality, performance  
and profitability!**

Locally developed using cutting-edge global technology, Protec's Paraglaze range is the smart choice for modern collision repair centres looking for a cost effective solution that refuses to compromise on quality and performance. Manufactured in Australia specifically to suit the needs of local refinish users, this advanced, solvent-borne paint system contains all the high-tech ingredients you need to match the very latest vehicle colours and produce a premium final finish. As well as being versatile, user-friendly and economical to use, Paraglaze also delivers enhanced productivity thanks to world-class coatings technologies which actively assist users to become more efficient via faster drying times, excellent coverage and reduced surface preparation.

## World-class technology

Featuring high quality materials and the very latest global coatings and pigment technology, Paraglaze is a streamlined paint system that offers technically advanced formulations in basecoats, primers and clearcoats. This cutting-edge technology has made it possible for hardeners and reducers to be standardised and fully compatible

across virtually the entire range, making it simple to choose the appropriate product for each application and significantly reduces the number of individual stock items that need to be kept on hand. The result is a versatile, cost effective range that is more than capable of meeting the demands of modern refinish applications.

## Features & Benefits

- Superior quality finish
- Cutting-edge global technology
- High efficiency to drive profitability
- Locally manufactured
- Ease of colour matching
- Exceptional durability
- User-friendly mixing and application
- Protec backup and service

## Clearcoats

Whether it is for one panel or a full respray, the Paraglaze clearcoat range literally adds the finishing touch with a premium 'wet look' appearance that is perfect for modern vehicles.

### 1 TO 2 PANELS

*Ideally for maximising cycle time on smaller jobs.*

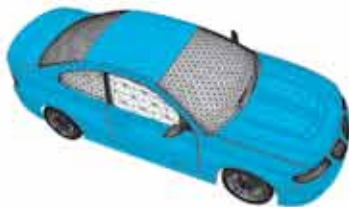

### HALF CAR

*The #1 choice for everyday, general refinish work.*

OR

### FULL CAR

*The high flow and optimum clarity is perfect for larger jobs.*

OR

Importantly, all of these clearcoats have been locally developed using technically advanced formulations that incorporate a high ratio of UV stabilisers. As a result, they are able to deliver exceptional durability, even in Australia's harsh climatic conditions where UV ratings are some of the highest in the world. Other standout features include, ease of application, first-class flow and levelling, fast cure times, excellent gloss and clarity straight 'off the gun' and the ability to easily de-nib and polish to a superb shine.

## Basecoat

Carefully formulated using premium pigments, the Paraglaze basecoat range contains a full complement of clear over base solid, metallic and pearl tinters which are capable of creating a complete spectrum of vehicle colours. Standout characteristics include high-opacity to achieve colour coverage in fewer coats, excellent metallic control, an extensive colour range and uniform tint strength and tone to make colour matching easier. In short, everything today's busy paint shops needs to be efficient and productive.

## Primers

Paraglaze primers are all about versatility and performance. As a result, the range delivers a cost-effective, high productivity solution that caters to any refinish priming application, thanks to multi-purpose products, a high build version and even a sealer and

adhesion promoter. Features of the range include the ability to use in high efficiency wet-on-wet mode, tint-ability to assist with quickly achieving coverage, excellent film-build, surface levelling and gloss hold out, as well as easy sanding.

## Training & Support

Protec's uncompromising commitment to delivering high quality solutions also extends to its customer support services which can put you in touch with specialist staff who have years of industry experience and know the Protec product range inside and out.

- For queries or advice, Protec's national Customer Service Team is just a phone call away.
- Protec's national network of professional representatives are also on-hand to assist with technical enquiries. All Protec Technical Demonstrators and Training Staff have a high level of expertise gained through trade experience and Protec technical training.
- Customers have access to a range of Protec training programs. This includes specific courses covering the Protec range and how to achieve the best results from it, along with methods and techniques to maximise coverage and minimise waste. Protec trainers can come to your workplace and offer a training package tailored to your needs.
- To ensure fast, timely delivery of products, Protec has established a nationwide network of distributors.
