Durability

Australian Made

## The cost effective, dedicated Commercial Transport coatings solution

These high performance product formulations, blend local knowhow with the latest global technology to ensure Paraglaze CT delivers true CT paint system performance.

Efficiently coating CT vehicles requires unique paint system properties which is why Protec created Paraglaze CT. Locally developed and made, it combines the outstanding Paraglaze Tinter System with specialised primers and a clearcoat specifically tuned to the requirements of CT users.

### Why you should choose Paraglaze CT:

- Designed for efficiency and productivity
- A versatile range of primers to suit CT substrates
- Incorporates all the advantages of the superb Paraglaze Tinter System
- Excellent opacity
- Australian developed and manufactured specifically to suit local conditions
- Highly durable, easy to use clearcoat
- Compatible with other products with the Protec range such as Flex Additive
- Comprehensive colour range to match local fleets
- Supported by state-of-the-art colour tools
- Compact system that's easy to use
- Eligible for Protec Autoguard Lifetime Warranty
- Protec back-up support and training

# Paraglaze CT

## Developed for local CT applications

Protec's local R&D Team has created a paint system tailored to the unique requirements of CT refinishers. Paraglaze CT is a compact, streamlined product range which combines a proven, high performance tinter system with specialised CT primers and a clearcoat that are all designed to work together. Another benefit is that it's also compatible with other Protec products such as the Flexible Additive – making Paraglaze CT ideal for use on PVC curtains, such as on 'curtain-sider' trailers, as well as banners and signs.

Whatever heavy vehicle you are dealing with – from trucks and buses to large trailers and tankers – Paraglaze CT delivers high productivity solutions to ensure you get the job done quickly and cost effectively.

## Primers

Paraglaze CT primers (PP-3450, PP-3979, PP-4660 and PP-5580) are specially

formulated to effectively provide a solid foundation over the wide variety of substrates found on heavy vehicles – from fibreglass and aluminium to zinc coated steel. The versatile range includes epoxy, etch, high build and primer-filler products and features excellent film-build, surface levelling and gloss hold out, as well as easy sanding.

## Paraglaze Tinter System

Thanks to excellent colour matching, coverage and control, along with fast and efficient flash-off, Protec's Paraglaze Tinter System is an ideal colour solution for CT applications. The compact range offers a comprehensive selection of direct gloss and basecoat colours to match local fleets. Easy to mix and apply, it also features excellent opacity which reduces application time and increases productivity.

## Clearcoat

The Paraglaze CT Clearcoat (PC-9200) incorporates a high ratio of UV stabilisers to ensure it delivers exceptional durability, even in Australia's harsh climatic conditions. Further features include, ease of application, excellent gloss and easy de-nibbing and polishing.

## Advanced colour tools

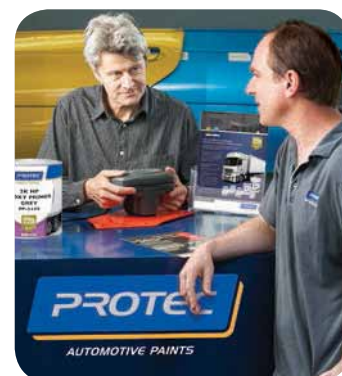

Paraglaze CT is backed by a range of colour tools, including industry leading colour software for fast colour formulation retrieval and mixing, as well as the hi-tech RapidMatch™ X-5 spectrophotometer. It can take a reading of a vehicle's paintwork and interface with the clever search functionality built into the colour software to select the closest colour formulation

## Protec Autoguard Lifetime Warranty

The Paraglaze CT System qualifies for the Protec Autoguard Lifetime Warranty (conditions apply).

## Training & Support

Protec's commitment to delivering high quality coatings solutions also extends to its customer support services which put you in touch with specialist staff who have years of industry experience and know the Protec product range inside and out.

- Protec's national Customer Service Team – 1800 076 466
- Nationwide technical support via the network of professional Protec representatives.
- Customised training programs.
