MaxiGLAZE

MAXI VERSATILITY, MAXI RESULTS

Already taking advantage of the proven AQUAMAX® Extra waterborne technology or PARAGLAZE® solvent-borne? Introducing the all-new versatile MaxiGlaze Clearcoat. Utilising the latest in 'high solid' global resin technology, it works well when applied over AquaMax Extra waterborne basecoat or the Paraglaze solvent-borne basecoat system.

The MaxiGlaze Clearcoat flows smoothly and leaves a superior finish, along with a nice crisp clarity, straight-off-the-gun. What's more, its broad ranging capabilities are ideal for today's refinish paint shop where it can tackle anything from a single panel right through to a full respray.
